

- 1) Attach fishing line from the rod to the end of the release mechanism. When letting line out use the reel drag tension to avoid tangles.
- 2) Top bolt adjusts tension for release system.
- 3) Attach leader line to the snap swivel. Leader from the diver to the bait should be one rod length.
- 4) Turn bottom of the Torpedo Deep Sea Diver to steer right or left.
- 5) Bottom bolt adjusts tension of the right/left ratchet system.
- 6) Attach 4' of fishing line between the *Torpedo Diver Cuda* and the Torpedo Deep Sea Diver using a snap swivel on each end to achieve depths of 400'.
